

PhotoRite™ SP Installation and Registration Guide

PhotoRite™ SP can be downloaded directly to your handset over the air through the Internet, or it can be installed from PC over infrared or Bluetooth connection.

Installation from Internet

To install PhotoRite™ SP from Internet, an infrared or Bluetooth connection is needed. The installation procedure is as follows:

1. Download the desired .sis file into your computer
2. On handset, go to Menu > Connectivity > Infrared/Bluetooth, Activate Infrared/Bluetooth.
3. On PC, use infrared or Bluetooth to transfer the desired installation file in (2) to handset. You can also use Nokia PC Suite to better manage your installation.
4. After transfer, a new message will be displayed on the handset. Open the message and follow the instructions on screen to complete the installation. It is recommended to install PhotoRite™ SP to memory card to save handset internal memory.

Installation from Mobile (Internet connection on handset is required)

Start the Internet browser on handset and enter the URL where the application is available for download at <http://www.PhotoRite.net/mobile/>. Select the desired installation file to download. After download, the installation will start automatically. Follow the instructions on screen to complete the installation. It is recommended to install PhotoRite™ SP to memory card to save handset internal memory.

Registration

After installation, you will need to enter the activation key to unlock the full version. You can purchase an activation key at http://www.PhotoRite.net/photorite_sp/. You will be asked for your unique handset IMEI (which can be found when you open PhotoRite™ SP or by pressing *#06# on your handset) to complete the process. After successful purchase, you will obtain a 5-digit activation key, which can then be input in the PhotoRite™ SP to unlock software.

Now you have completed installation and registration of PhotoRite™ SP. Enjoy the unlimited fun with PhotoRite™ SP! Visit http://www.PhotoRite.net/photorite_sp to download more photo frames, add-on effects, and learn how you can create your own photo frames!
